\*\* A **Regional Forum and Workshops** will encourage regionally-based water collaboratives to work closely with the Steering Committee and Advisory Committee on Integrated Regional Water Management initiatives. DWR will conduct numerous regional workshops to inform the Water Plan Update about communities of place and their regional water issues and management strategies. Annually, regional collaboratives will be invited to a Regional Forum to discuss regional issues having statewide impacts, “place-based” water issues such as data availability, lessons learned, and best management practices.
